# TROPOS

# **Summary of Intercomparison:**

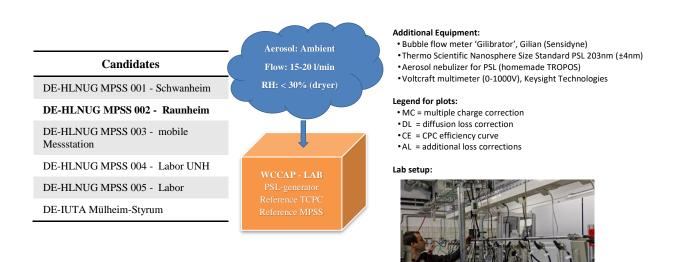

#### Pre-Status:

The candidate from DE-HLNUG MPSS\_002 Raunheim participated in the ACTRIS workshop from October 15, 2018 to October 19, 2018 with the participant. The setup of the candidate was done on Monday, October 15<sup>th</sup>, afternoon. During the Pre-Status the candidate was running under the same settings, with their own TSI Kr.85 source, like on the Institute. The performance of the candidate showed a concentration in the same level than the TROPOS Reference Instrument No.1. On Tuesday, October 16<sup>th</sup>, after the CPC-Workshop the MPSS was checked and the first part of maintenance was done. The performance of the CPC is shown in the Report of the CPC-Workshop. The TSI CPC 3772 passed the CPC Workshop after maintenance. For more information, please look at the CPC-workshop report. During the workshop week, the whole candidate was checked and cleaned. More details are in the Tables for each night run. The participant was instructed and trained how to optimize his instrument. In addition, the station setup and quality assurance procedures were discussed.

#### Final-Status:

The final run took place from October 18 to October 19, 2018. Running the candidate using the original source Kr.85 the performance showed a concentration 1% lower than the TROPOS Reference Instrument No.1.. The candidate passed the standards of ACTRIS and GAW.
